Date FEB 2025	By CTG		Notes: 1) This visualisation is a cylindrical projection panorama. It provides landscape and visual context only. 2) Data results have been derived directly from the computer model of the landform and include the effects of atmospheric refraction and the Earth's curvature. They do not take account of visual screening from obstacles such as existing built form and vegetation. 3) All directions given as bearings relative to Grid North (BNG). 4) The Application Site Boundary of the Proposed Development (outlined in red) is provided for reference on the location map (left), where visible and within range.
